

## SUMMARY

Data Analytics professional with over 7 years of experience delivering end-to-end analytics solutions. Adept at leveraging data storytelling and analytical frameworks to drive product insights and strategic decision-making. Proven success in collaborating with cross-functional teams. Demonstrated impact in transforming business operations into data-driven environments, notably enhancing reporting standards and supporting product teams to align with evolving market demands.

## EMPLOYMENT

### Code.org

**Localization Program Manager** · Aug. 2024 to Current · Remote

- Collaborated with project managers and the marketing team to define deliverables aligned with go-to-market (GTM) strategies.
- Coordinated with third-party vendors to proofread training data, optimizing the Translation Management System (TMS) with AI language models (LLMs).
- Led a team of volunteers to incorporate feedback into the minimum viable product (MVP).

### Chegg Inc

**Senior Product Analyst** · Apr. 2023 to June 2024 · Santa Clara - CA

- Provided data-driven insights to the UX/UI team for the alpha version of CheggMate (Multi-Turn Chat System), leading to redefined KPIs that aligned with AI-driven business needs.
- Developed Interface Requirement Documents (IRDs) and product launch analytics plans in collaboration with Product and Data Solutions, ensuring alignment with stakeholder goals from day one.
- Collaborated on A/B test analysis (design, implementation, and results interpretation) for Chegg's new LLM platform (MTC) as part of a 4-member core team.
- Automated reporting pipelines in Tableau, Amplitude, and Excel, streamlining A/B testing and GTM strategy execution.

**Manager, Business Operations Analysis** · Apr. 2020 to Mar. 2023

- Conducted a comprehensive analysis of Covid-19's impact on the business, providing actionable insights to the strategy team, which contributed to a significant increase in company market value.
- Partnered with Product Managers to optimize the company's e-reader app features, using Amplitude dashboards and models using detailed clickstream data to guide enhancements.
- Performed ROI analyses on multiple products (TBS, Q&A), leading to a strategic shift away from TBS investments and changes to the "In-House" answering team operations in India.

**Senior Business Analyst** · Oct. 2018 to Mar. 2020

- Utilized machine learning algorithms to create demand forecasting models for textbook editions, leveraging R and Python on the DataBricks platform.
- Led dynamic pricing implementation for a catalog of over 10M SKUs using time series analysis in R, resulting in significant revenue growth.
- Conducted seasonal adoption analyses to identify potential catalog expansion opportunities for the consignment program, partnering with major American college textbook publishers to drive growth.

**Business Analyst** · Apr. 2017 to Sept. 2018

- Implemented and automated custom data pipelines (ETL) to executive dashboards in Tableau/Domo for the textbook business unit, streamlining reporting and insights delivery.
- Developed and automated detailed marketing funnels for each ISBN using Adobe Analytics and Redshift on the DataBricks platform, enabling near real-time insights into user behavior to optimize pricing decisions.
